FOR HIRING MANAGERS

Performance-driven and technically grounded Product Leader with over 13 years of experience orchestrating high-stakes software lifecycles for global automotive leader Mercedes-Benz Mobility and high-growth digital ecosystems across the FinTech, ESG, and ClimateTech sectors. Expert at transforming complex executive vision into rock-solid PRDs, technical architectures, and rigorous rollout management strategies, maintaining a strict focus on Agile/Scrum delivery, bi-weekly release cadences, and robust QA/Security benchmarks. A master cross-functional orchestrator trusted to manage international partners, align multi-stakeholder requirements (Business, Engineering, Legal, Procurement), enforce pre-launch vulnerability checking, and safely ship systems built for global scale.

TECHNICAL EXPERIENCE

Product Manager – ESG MRV Digital Solutions

Verity Nature Ltd

Aug 2023 - Nov 2025

Singapore/Australia/New Zealand

- **Agile & SDLC**

Managed the end-to-end delivery of a Digital MRV platform, serving as the primary engineering and design liaison for sprint planning and backlog grooming. Planned out product roadmap, prepared product requirements and feature requirements. Prepared test & demo runways, planned security scanning before launch. Gathered reviews, feedback and turned into new updates/enhancement requirements. Released product report update to stakeholders and C levels periodically.

- **Rollouts Management**

Enforced product release integrity by managing deployment cycles strictly aligned with organizational security and quality protocols. Orchestrated comprehensive pre-launch check-runs—including the delivery of rigorous testing evidence, comprehensive release notes, cyber security vulnerability scanning, and proactive technical loophole patching—to guarantee flawless, risk-mitigated production updates.

- **Technical Building Blocks**

Decomposed complex biodiversity and hydraulic requirements into scalable technical specifications, ensuring the platform could support multiple "use cases" (from reforestation to carbon credit auditing) without building one-offs.

- **Accomplished end-to-end execution and delivery of a scalable Digital Environmental MRV system**, as measured by a 100% adoption rate across complex AU/NZ markets, by creating an "Offline-First" client-server architecture integrated with data sync real time to cloud database.

Product Manager - Digital Planting/Nature Restoration Solution

Verity Nature Ltd

Aug 2023 - Nov 2025

East Africa

- **Complex Client-Server Architecture & Delivery:** Managed the end-to-end execution of a large-scale, crowd-sourced digital ecosystem optimized for low-bandwidth environments and SMS/API-based integrations across international workstreams.
- **Incentive Engineering & Automated Rollouts:** Engineered a gamified "Leaderboard and Rewards" framework that utilized edge-case photographic and GPS metadata verification to trigger automated rewards, driving strong user engagement and asset retention.
- **Data Analytics & Decision Support:** Built a comprehensive data analysis tool tracking real-time lifecycle metrics for thousands of active field data points, serving as a critical multi-stakeholder reporting and decision-support mechanism for cross-market alignment.

Lead UX/UI Designer - Mercedes-Benz Customer Portal

Mercedes-Benz Mobility AG

April 2019 - Mar 2022 / Dec 2022 - Oct 2023

Singapore/Germany

- **Strategic Application Building**

Managed the evolution of global customer portals, building applications to the highest standards of a Tier-1 automotive brand to improve aftersales user retention.

- **Domain Expertise**

Interacted closely with Sales, Services, and Market Owners across AAP and European markets to refine feature development based on diverse regional business processes.

- **Agile Collaboration**

Worked within an agile methodology to drive high-quality implementation, serving as the primary translator between business-centric goals and developer-centric requirements.

- **Stakeholder Coordination** Balanced conflicting priorities across distributed teams in SEA and EU, driving technical alignment and delivery management.

- **Managed the end-to-end design roadmap, overseeing the product lifecycle from concept creation to design, usability testing, development readiness, and production stages.**

- **Cross-Industry Initiative Delivery:** Orchestrated the product research and design roadmaps for high-stakes digital applications across diverse domains, including FinTech trading systems, the AIA x Amplify Vitality health app, and enterprise oil trading platforms.
- **Strategic Roadmap Alignment:** Partnered directly with client executives and internal stakeholders to align feature development roadmaps with complex organizational objectives, business requirements, and emerging market competition trends.
- **Rapid Validation & Prototyping:** Led rapid interactive prototyping, usability testing, and hypothesis-validation processes to quickly de-risk new product ideas, compressing the cycle from concept formulation to engineering readiness.
- **Data-Backed Decision Support:** Utilized statistical data analysis, user research insights, and productivity metrics to bridge the gap between business owners and engineering teams, driving evidence-based product optimizations and high customer satisfaction.

- **Quality Gatekeeping & Release Readiness:** Authored and updated rigorous technical test cases and comprehensive validation plans to ensure complex feature deployments achieved a 100% pass rate prior to critical milestone live demos.
- **Full-Cycle Quality Assurance Execution:** Executed end-to-end testing pipelines—including Blackbox, UI, User Acceptance Testing (UAT), Performance, Load, and automated Regression testing—to accelerate sprint velocities and prevent post-release production defects.
- **Content Management Integration:** Directed functional validation and CMS infrastructure testing across diverse enterprise web platforms (Sitecore, Wordpress, Joomla, OpenCMS) to secure reliable data synchronization.
- **Cross-Functional Quality Alignment:** Partnered closely with Product Managers, Technical Leads, and engineering squads to embed shifting business requirements into clear technical criteria, maintaining a zero-compromise standard for final project quality.
- **Security & Compliance Awareness:** Spear-headed the alignment of technical execution with general project timelines, ensuring software builds cleared rigorous functionality and stability scans ahead of cross-market deployment rollouts.

SKILLS

Product & Execution	Agile/Scrum Frameworks, 2-Week to 1-Month Release Cadences, Functional PRD Authoring, Vendor & International Partner Management, Cross-Functional Alignment (Development, Design, Procurement, Legal, Engineering), Jira, Confluence, Clickup, Trello.
Domain & Architecture	Connected Services, Client-Server Systems, API/SDK Third-Party Integrations, Offline-First Architecture, Infotainment & App Ecosystem Alignment, Mobile-First Best Practices (iOS/Android Native).
Data & Analytics	Earth Observation (EO) Data, Geospatial Analytics, SQL, Data Visualization (IBM), Google Data Analytics, KPI Tracking, Market Competition Analysis.
Design & Innovation	Design Operations, Capacity Planning, Figma, Miro, Webflow, Framer, Usability Testing, AI-Enabled Workflows, Advanced Prototyping Methodologies.
Quality & Security	Deep technical proficiency in Test Case Development, Functional Security Scanning Protocols, Blackbox, Automation, and Regression Testing (Legacy QA background at Gameloft & Sutrix).
AI Efficiency	Shipped products end-to-end using Gemini, Copilot Pro, Vercel, Cloudfare, Turso, Canva AI, Figma AI, and other AI tools.
Other Tools	VS Code, Github, Gitlab, Adobe Suites, Blender, Rive, Canva, Hotjar, UserTesting.
Communication	English (fluent speaker), Vietnamese (native speaker)

EDUCATION

Google Project Management, Project Management, Coursera	2025
Google Data Analytics, Coursera	2025
Data Analysis and Visualization Foundations (IBM), Coursera	2025
Certified Associate Project Management, Institute of Project Management	2021
Polytechnic Diploma, Communication Design, Orita Sinclair	2018
Professional Certificate in Graphic Design, Hoa Sen University	2017

ACTIVITIES

Founded Boulder Box Saigon, Vietnam	2023 — Recent
Founded Non-Profit Trekking & Charity Youth Club	2013
